PRACTICE INNOVATION POSTER AWARD

Submission Deadline: **October 1**

The Practice Innovation Poster Award recognizes one excellent Practice Innovation Poster presenter each year at the annual conference. The recipient receives one free conference registration for the following year.

Practice Innovations: This category allows for a variety of posters that provide a review of the evidence, describe the successful implementation of creative ideas, innovative practice solutions, creative management of a specific patient population, pioneering role presentations, case studies, ground-breaking programs or teaching strategies, unique approaches to management of a specific patient problem, preliminary data collection for a project, etc. This category also includes evidence-based projects, which include review and appraisals of research evidence and descriptions of original programs that have been implemented and evaluated. Integrative literature reviews are also included in this category.

For practice innovation proposals: The abstract should include: Details about the project, case, preliminary work, quality improvement process, role, target population, measurable outcomes, etc., addressing the following areas as appropriate: background, aims of service change, details of innovation, outcome, discussion of effects/implications, demonstration of improvement, evaluation of change, lessons learned/tips for practice, case study or a model that can be adapted or replicated by other organizations or care providers.

Note: Abstracts must be no more than 2500 words.
