

Strategic Plan 2024-2027

Vision

All infants, children, adolescents and young adults receive equitable high-quality pediatric health care.

Mission

Optimize the health and well-being of all infants, children, adolescents and young adults and empower our community of pediatric experts.

Strategic Goals

Promote pediatric health equity and quality care through evidence-based education and advocacy.

- Elevate research and scholarship (e.g., evidence-based practice, quality improvement)
- Develop accessible, cutting-edge educational offerings
- Prioritize child health advocacy

Advance and support a diverse pediatric nurse practitioner workforce across career trajectory.

- Advocate for priorities and policies related to workforce development and advancement
- Partner with pediatric nurse practitioner programs, faculty and students to advance pediatric education and training
- Provide early career professional development support
- Support ongoing professional development across career stages and pathways

Establish and sustain strategic collaborations to advance child health.

- Establish a global network of collaborators
- Engage external stakeholders and organizations to promote the pediatric nurse practitioner workforce and child health
- Strengthen internal collaborations (e.g., committees, SIGs, chapters)

Optimize the NAPNAP ecosystem to be responsive to its constituents.

*Constituents include members, chapters, SIGs, board, committees and affiliates.

- Promote diversity, equity, inclusion and belonging
- Serve as the professional home for APRNs caring for children
- Build and sustain an organizational culture that prioritizes member belonging and engagement
