

Michael Maymi, DNP, APRN, CPNP-AC, CCRN-P, CNE

Florida Chapter

Candidate for Treasurer

PERSONAL STATEMENT

As a clinical associate professor and pediatric advanced practice registered nurse, my career is dedicated to enhancing child health through education, advocacy and innovation. These experiences uniquely position me to contribute to NAPNAP's mission of optimizing the health and well-being of children while empowering pediatric experts. I led initiatives that integrated evidence-based practice with accessible education, including creating podcasts for graduate students, offering learning opportunities beyond the classroom and developing innovative educational offerings. My experience in developing mobile applications prepares me to further these opportunities for our members.

My vision for NAPNAP is to strengthen its role as a global leader in pediatric advanced practice nursing by fostering innovation, advocacy and inclusivity. NAPNAP should champion equitable access to care, expand professional development resources and build a strong international presence. I have contributed to these priorities by creating the Pediatric Nurse Practitioner Competency Framework for the PNCB, which supports career development and self-assessment. This framework aligns with NAPNAP's goal of supporting ongoing professional development. My participation in ICN NP/APN conferences highlights the need for NAPNAP's presence in global forums, and I am eager to establish partnerships worldwide.

My leadership style is collaborative, inclusive and strategic, embracing servant-leadership principles through transparency and shared decision-making. I lead diverse teams in developing educational resources and competency frameworks by engaging stakeholders and aligning organizational goals, reflecting NAPNAP's values of respect, accountability and visionary leadership.

I am confident in my ability to advance NAPNAP's work. Advocacy, education, research and member engagement; areas where I have demonstrated measurable impact. I can contribute to advocacy by collaborating on policy and educational resources addressing pediatric health challenges. I will support initiatives integrating technology and evidence-based content into continuing education programs. I will apply strategic foresight to recruit leaders reflecting the diversity and expertise needed for NAPNAP's long-term goals. By leveraging data-driven decision-making and anticipating future healthcare trends, I will ensure NAPNAP remains agile and influential.

In summary, my professional experiences, vision, collaborative leadership style and strategic thinking align with NAPNAP's mission, vision and priorities. I am committed to advancing the organization's goals and supporting its members.
